**46582**

(Zip Code)

Registrant's telephone number, including area code: **(574) 268-6379**

**Not Applicable**

(Former name or former address, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

<b>Title of Each Class</b>	<b>Trading Symbol(s)</b>	<b>Name of each exchange on which registered</b>
Common Stock, \$0.00025 par value per share	KIDS	Nasdaq Global Market

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 under the Securities Act (17 CFR 230.405) or Rule 12b-2 under the Exchange Act (17 CFR 240.12b-2).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act

**Item 7.01. Regulation FD Disclosure.**

On June 10, 2020, OrthoPediatics Corp. (“the Company”) issued a press release announcing the initial domestic launch of the ApiFix Minimally Invasive Deformity Correction (“ApiFix”) system. The ApiFix technology is a posterior dynamic deformity correction system approved for use in AIS patients with Lenke type 1 and Lenke type 5 curves of 40° to 60° and acts as an internal brace implanted unilaterally on the concave aspect of the curvature. It enables surgeons to perform a unique treatment and provide permanent curve correction while retaining spine flexibility, all via a less invasive surgical procedure compared to spinal fusion. A copy of the press release is furnished as Exhibit 99.1 to this Current Report.

The Company does not intend for this Item 7.01 or Exhibit 99.1 to be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

## **OrthoPediatrics Corp. Commences Initial U.S. Launch of ApiFix's FDA-Approved Spinal Deformity Correction System**

*ApiFix, the only posterior motion-preserving scoliosis correction technology available in the U.S., provides unique advantages for treating progressive adolescent idiopathic scoliosis*

**WARSAW, Indiana, June 10, 2020 — OrthoPediatrics Corp.** (“OrthoPediatrics” or the “Company”) (Nasdaq:KIDS), a company focused exclusively on advancing the field of pediatric orthopedics, is pleased to announce the initial U.S. launch of the ApiFix Minimally Invasive Deformity Correction (“ApiFix”) system. Additionally, the Company anticipates approximately 20 leading clinical centers in the United States to enter data related to the use of the ApiFix system into a post-approval study registry hosted by the Pediatric Spine Study Group in order to continue monitoring the safety and probable benefit of the device for the treatment of progressive adolescent idiopathic scoliosis (“AIS”).

The ApiFix technology is a posterior dynamic deformity correction system approved for use in AIS patients with Lenke type 1 and Lenke type 5 curves of 40° to 60° and acts as an internal brace implanted unilaterally on the concave aspect of the curvature. It enables surgeons to perform a unique treatment and provide permanent curve correction while retaining spine flexibility, all via a less invasive surgical procedure compared to spinal fusion. Patient recovery is relatively pain-free and is measured in days, not months. The ApiFix system offers a patented unidirectional, self-adjusting rod mechanism and motion-preserving polyaxial joints, allowing additional post-operative correction over time.

Paul Mraz, Senior Vice President of OrthoPediatrics and former President and CEO of ApiFix Ltd. commented, “ApiFix’s novel approach to correcting spinal deformity is a welcome medical advancement that has the ability to disrupt the continuum of care for scoliosis treatment in certain pediatric patients. Its elegant design and biomechanical considerations combined with the simplistic posterior approach is unmatched and provides a superior technology for treating AIS. Now that the pause of elective surgeries due to COVID-19 is lifting, we look forward to initiating the commercial availability of the procedure in the United States and anticipate the first procedures to be performed in the coming weeks.”

Jeff Smithey, Vice President of Spine at OrthoPediatrics added, “We are excited to begin providing access for this game-changing technology to children in the U.S. who are dealing with progressive scoliosis. The ApiFix system fills a major treatment gap after failed bracing and offers a viable treatment alternative potentially allowing patients to avoid fusion surgery with what we believe to be the least invasive surgical procedure for correcting scoliosis available in the world.”

ApiFix’s unique technology is supported by strong intellectual property protection, including 46 U.S. and international patents granted and 25 patent applications worldwide. ApiFix, a leader in motion-preserving scoliosis correction, was recently acquired by OrthoPediatrics in April 2020 and operates as a wholly-owned subsidiary based in Israel.

### **About OrthoPediatrics Corp.**

Founded in 2006, OrthoPediatrics is an orthopedic company focused exclusively on advancing the field of pediatric orthopedics. As such it has developed the most comprehensive product offering to the pediatric orthopedic market to improve the lives of children with orthopedic conditions. OrthoPediatrics currently markets 35 surgical systems that serve three of the largest categories within the pediatric orthopedic market. This product offering spans trauma and deformity, scoliosis, and sports medicine/other procedures. OrthoPediatrics’ global sales organization is focused exclusively on pediatric orthopedics and distributes its products in the United States and 43 countries outside the United States. OrthoPediatrics acquired ApiFix Ltd. in April, 2020. The ApiFix system has FDA and CE Mark approvals and is now available in the USA, Canada, Europe, Israel, and Singapore.
